

Saab. It's what a car should be.

Saab 99 LE

The Saab 99 LE has just about everything you could possibly want in a car. Even if you designed it yourself.

It has front-wheel drive for great handling on any road surface, rack-and-pinion steering to give you a good feel of the road, and a 2-liter, fuel-injected engine that will give you about twice as much gas mileage as most full-size cars.

It also has power-assisted disc brakes on all four wheels, a unitized steel body for extra strength and safety, impact-absorbing bumpers, and a spacious interior that gives you a lot more than just elbow room.

There's an electrically heated driver's seat that keeps you warm until the car warms up. And all seats are upholstered in soft, comfortable nylon velour that won't freeze you in winter or stick to you in summer.

And when you are not carrying passengers around, a Saab 99 LE lets you carry around other things. The rear seat folds down to give you enough room to carry things like lawn mowers, bicycles, or even weekend camping equipment.

The Saab 99 LE comes in both 2-door and 4-door models. The Saab 99 LE 2-door has extra wide doors for easy entry in to the back seat.

The Saab 99 LE 4-door makes the back seat even more accessible as the

door frame is shaped like the seats to make it easier to get in and out.

And both models have recessed door sills to aid you stepping in or out.

The Saab 99 LE. It's what a luxurious car should be.

Saab 99 WagonBack

Like the Saab 99 LE, the Saab WagonBack has a spacious interior with more than enough room for 5 passengers. It also has a 2-liter, fuel-injected engine, front-wheel drive, rack-and-pinion steering, and 4-wheel, power-assisted disc brakes. But unlike other sedans,

you can open the rear door of the WagonBack, slip out the rear-window shelf, fold down the seat and get 53 cu.ft. of cargo space. And the door opens all the way down to the bumper height, so you don't have to strain to lift things in.

The WagonBack cargo space is comparable to station wagons in Saab's class too, so you get all the roominess of a station wagon. With all the luxury of a sporty sedan. In one car.

Saab 99 EMS

For those people who want a little more luxury and sportiness in their Saab, we made the Saab EMS. It comes equipped with wide, steel-belted radials, cast aluminum wheels, a tachometer and clock, color-coordinated rear-view mirrors, racing stripes, a specially designed interior, a rear-seat center armrest, and gold EMS emblem on the grille.

To make it perform like a sports car, there is a 2-liter, fuel-injected, overhead cam engine that develops 118 hp net SAE (87 kW). And to make it handle like a sports car, it has rack-and-pinion steering and four-wheel, power-assisted disc brakes.

The Saab EMS. It's everything you want in a sports car. In a Sedan.

Technical specifications	Saab 99 LE	Saab 99 WagonBack	Saab 99 EMS

Load length with folded seat	67.7 in. (1720 mm)	72.4 in. (1840 mm)	67.7 in. (1720 mm)

Electrically Heated Driver's Seat. It works like an electric blanket to keep you warm on cold mornings.

Impact-Absorbing Bumpers. They protect the car. And since they return to their normal shape, they protect themselves as well.

Roll-Cage Construction. We hope you never need it, but it's nice to know it's there.

Impact-Absorbing Headliner. At Saab, safety has always been a major concern.

The manufacturer reserves the right to make changes at any time and without notice.
